Five years of experience as an IT professional focused to obtain a challenging position in an organization that gives me an opportunity for self-improvement and leadership while contributing to the growth of the organization with my technical, innovative, and logical skills.

EXPERIENCE

Junior Software Developer   06/2021 - Present
Jewels By Love, France (Remote)
PHP – 90%, XML – 80%, JavaScript – 90%, Jira – 95%, E-commerce concepts – 90%, API – 80%

- **Address and resolve** technical issues in **Magento stores**, ensuring minimal downtime and optimal performance
- **Develop and customize** Magento extensions using **PHP, XML, PHTML and JavaScript** to enhance store functionality
- Creating **server-side script that directly run via CMD** for bulk operations and managed data integration with **phpMyAdmin (MySQL)**
- **Applied concepts** like **inheritance, polymorphism and encapsulation** and **followed MVVM and MVC** design patterns to ensure scalable and maintainable code architecture
- **Conduct daily virtual meetings** to discuss progress, challenges, and plans for the day
- Contributed to the issue tracking, sprint planning, backlog prioritization and reporting **Using Jira**

Associate Web Developer   09/2020 – 04/2021
Brainvire, India
SQL – 95%, MVVM – 95%, MVC – 90%, Monday.com – 80%, GitHub – 90%

- Develop clean and efficient code based on the requirements using various technologies like **PHP, Magento, KnockoutJS, MVC, XML, jQuery, JavaScript, HTML5, CSS, SQL Server,** etc. Integrate and deploy programs and websites. Troubleshoot, debug and upgrade the existing software.
- Designed, developed, and maintained Continuous Integration/Continuous Deployment (CI/CD).
- Contributed to automation, timelines, dashboards, customizable workflows and collaboration using **Monday.com**
- Responsible for creating new and updating existing extensions.
- Used version control system **Git** and platform **GitHub** for code collaboration, issue tracking and version management.
- Worked closely with designers, product managers, and other stakeholders to understand project requirements and deliver high-quality solutions.

Web Developer   07/2018 – 06/2020
Akash Technolabs, India
FileZilla – 80%, Slack – 70%, Workbench – 60%

- Developed a web-based application using PHP technologies like **Laravel, MVC, SQL server, jQuery, JavaScript, HTML5, CSS**.
- Also responsible for unit testing, enhancement, and FTP deployment of the application.
- **Use slack** channels for different project or topics and integrate with other Agile tools for seamless updates.
- Used project management tool **Jira** to track progress and collaborate with team members.
- Conducted performance tuning and refactoring of code to improve load times and resource utilization.
- Managed database using SQL (**MySQL, MySQL Workbench, PostgreSQL**).

EDUCATION

Mobile Application Development | GPA –3.9   09/2022 – 12/2023
Fanshawe College, London, ON

Bachelor of Computer Science & Information Technology   07/2015 – 06/2018
Gujarat University, India

PROJECTS

[Virtual Cook](#) | ⬤ | **React Native, Material UI, Expo, React-redux, Expo-speech, Expo-sharing, React Native Paper, VS Code**

- Utilized the **React Redux structure/methodology** for efficient state management. **Integrated stack navigation and text-to-**

speech using expo libraries.

- **Developed interactive features** like notification and phone shake and **utilized modal** to display recipe filter and sorting options, enabling users to **switch between language options**, French and English
- **Additional features** include recipe sharing, search options, dietary restrictions, app color customization, and access to random recipes.

Product On Rent | ◯ | PHP, Laravel, jQuery, Ajax, MVC, CSS, HTML, JavaScript, MySQL, Bootstrap, PHP Mailer, Postman, VS Code

- Developed a **web application** for rental products **using Laravel, adhering to MVC, MVVM, and MVBC structures.**
- Managed database operations with **MySQL Server** and implemented **server-side logic using PHP.**
- Implemented pop-up messages using **JavaScript and SweetAlert.**
- Integrated **PHP Mailer** to send confirmation emails and utilized **Ajax** for dynamic country, state, and city selection functionality.

ASK ME For Immigration | ◯ | PHP Core, PHP, MySQL, PHP Mailer, CSS, HTML, Bootstrap, jQuery, Ajax, JavaScript

- Designed to assist international students with immigration queries, providing information on universities/colleges, fees, contacting academic advisors, application procedures, and more.
- Implemented **features** for students **like send follow request(s)** to experts, **post like, questions, answer and replies**, similar to **Instagram and Facebook functionalities**.
- **Developed interactive features** such as notifications, likes, follow requests using jQuery, Ajax, and JavaScript.
- **Utilized Bootstrap and custom CSS** for an intuitive and user-friendly interface.

Category Collection Module | ◯ | Magento 2, XML, MVVM, PHP, MySQL, KnockoutJS, CSS, HTML, jQuery, JavaScript

- Designed to showcase subcategories with category banners on the product listing page.
- **Utilized MVVM** pattern by **overriding XML files**.
- Created a new category attribute to display custom data, managed via **InstallData and UpgradeData** scripts.
- **Created Block and Helper class** to implement custom functionality.

SKILLS

Programming Languages:	PHP, Java, JavaScript, XML, Swift, Kotlin, HTML5, CSS, C#, Node.js.
Web Frameworks:	React Native, Magento, Laravel, WordPress, jQuery, MVC, MVVM, KnockoutJS.
Database:	MySQL, MySQL Workbench, SQL Lite, SQL, Firebase, Relational Database.
Concept:	Agile, Scrum, IaaS, PaaS, SaaS, RESTful API, PWA, UI/UX, GIT, Excel VBA, Ajax, Email Management, Microsoft Office.
Tools:	Visual Studio Code, NetBeans, Jira, Postman, Docker, Xcode, Android Studio.

SOFT SKILLS

- Programming Languages
- Self-Starter
- Multitasking
- Code Structure & Architecture
- Problem Solving
- Teamwork
- Front-end & Back-end web development
- Organizational Skill
